

# Learn to Touch Type **90** *in just* minutes

## KAZ (Keyboard A-Z)

This single 90-minute KAZ course will **REVOLUTIONISE YOUR** working day **EVERYDAY!**  
(... and thats for the rest of you life!)

## You'll wonder how **YOU** ever managed before....

*Hold onto any pre-conceptions you may have about touch typing - see what **YOU** are missing.....*

Following a year-long research study on its effectiveness, The Open University provided the KAZ course to over 400,000 students. These students had to balance work and study under pressure and had little or no spare time. This simple, quick and easy course won back time for these students, allowing them to focus on their work rather than the keyboard.

## **YOU** can now get the same benefits.

### **Just 90 minutes is all you need to:**

- Save time today and everyday
- Really enjoy using your computer
- Type rhythmically, accurately and faster than you thought possible
- Think about what you want to write instead of how you type
- Save time correcting typing errors
- Help protect yourself from RSI
- Really impress yourself and your colleagues

If you thought touch typing was not for you or that it was too hard to learn, be prepared to be pleasantly surprised! KAZ, short for '**Keyboarding A-Z**' uses a unique, scientifically developed ACCELERATED LEARNING method of teaching, that teaches most people how to touch type the A-Z keys in just 90 minutes! OK, you won't be touch typing at speed immediately BUT you will be touch typing with all 10 fingers - speed will soon follow.

Just imagine being able to effectively '**think type**' your words straight onto the screen at speed without making or correcting typing errors. *This has been described as **throwing off lead weighted boots.***

If you think you already type quickly with 2 fingers - try typing with all 10! Remember that although you will need to take a step back to learn properly, you will quickly overtake your old speed and make far fewer typing mistakes.

Ideally set aside 90 minutes to learn to Type the A-Z keys correctly. First, listen to the short introductory section in 'Flying Start', explaining how KAZ works and then move onto the following section called 'The Basics' - where you will learn to touch type the A-Z keys in record time using specific combinations and progressions of just 11 words in 5 phrases. You can then progress through the course finishing with KAZ 'SpeedBuilder' - where you will improve your skill and accuracy.

Please don't be tempted to revert back to using just '2 fingers'. Use your new skill immediately as you work. Initially, you must expect to be slower at touch typing. Remember sometimes it is necessary to take one step back in order to take 2 forward.

Finally, take a look at the 'My Settings' tab, located in the top banner on the 'Select your KAZ version' page (here you can enlarge/reduce the screen size as preferred) and lastly, amaze yourself when you view your progress in the 'My Results' tab.

Good luck and happy learning!

The **KAZ** Team
